BLOCK WALL

Sales, Service, Expertise...

Let our experience be your guide

- 80 and 160 ton salt models pre-configured for fast deployment.
- Optimized block configurations for each size.

All Shelters Feature:

Easy Installation

- Each Salt Dome comes with complete installation instructions.
- All hardware and anchors are included.

Reinforced Mesh Vent

- Rear fabric walls come complete with steel reinforcing framework and porous vinyl mesh vent.
- Allows wind to escape, but keeps water and snow out.

High Clear Height

- Ease of access for dumping and loader operation.

Cabling

- Each shelter includes galvanized cable cross-bracing.
- Boosts rigidity and stops sway.

Specialized Cement Anchors

- Each shelter includes galvanized concrete anchor assemblies.
- Easy to install and relocate if necessary.

TOP QUALITY MATERIALS

Aggregates and salt put storage structures to the test. When exposed to UV, wind, and the corrosive nature of salt... **Dome Shelter Systems™ are designed to PROTECT & PERFORM.**

Galvalume™ Framework

Long term performance starts and stops with corrosion resistance - Galvalume™ PROTECTS. Galvalume™ is an inline continuous hot-dip process - galvanizing both inside and outside of all tubing. This unique lab tested coating exhibits corrosion resistance over 5 times that of conventional pre-galvanized steel. Unlike conventional hot-dip galvanizing - Galvalume™ is smooth to the touch with a lacquer top coat to prevent cover abrasion. All welded areas are protected by self healing cold galvanize.

High Performance 18oz. PVC Covers.

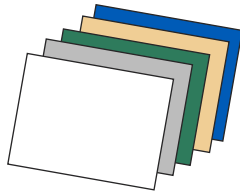

The standard fabric on all Dome Shelter Systems is designed for rough handling applications. While remaining flexible in the cold, its heavy weight design gives it unmatched puncture, tear and "rip-stop" strength. Manufactured to resist UV degradation and remain water tight.

Ratchet Cover Tensioning

Our proven ratcheting cover system provides a drum tight appearance and helps shed snow. This translates to a long and low maintenance cover life that we are proud to warrant for 5 years.

Custom color schemes available.

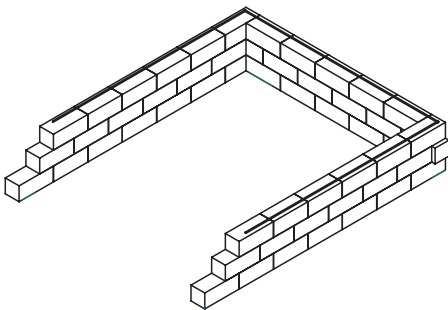

Shelter size: 18' Wide x 12' High x 24' Long

Each of our shelters is manufactured using top quality components in our Toronto plant.

Existing Blocks?

- From our full line of shelter systems, we can make a Dome to suit your existing foundation.

Know how many tons you need to store?

- We know what it will take to service your requirement.
- Let us recommend a dome to suit from our selection of many standard sizes.

Shelter size: 40' Wide x 20' High x 40' Long
